PortionPro Rx™ Quick Start Guide
You are programming ("assigning") this feeder for one dog or cat.

1. **Select Location**
   Near outlet, against wall, bowl facing out.

2. **Move Tag(s)**
   Place tag(s) at least 3 ft (90 cm) away from feeder.*

3. **Insert Power Cord**
   Insert round end into underside of feeder base as shown; plug other end into wall outlet.

4. **Insert Bowl**
   You are programming ("assigning") this feeder for one dog or cat.
   Use + or - to scroll through options.
   Press ✓ to confirm choice.
   Hold 2 seconds to go back one step.

5. **Set Current Time**
   Press + or - to choose AM or PM. Press ✓ to confirm choice. Repeat to set hours and minutes.

6. **Select Dog or Cat**
   Choose dog or cat icon, then confirm.

7. **Select Meals Per Day**
   For a cat, choose 2, 4, or 6 meals.
   For a dog, choose 2 or 3 meals.

8. **Set Meal Times**
   2 or 4 meals: set time for each meal.
   6 meals: set time of first meal.*
   2 or 3 meals: set times for each meal.

*Each pet in your home should receive a PortionPro Rx collar tag.
*All remaining meals will be spread equally over 24 hours.
9 Enter Total Cups PER DAY

PortionPro Rx will divide total equally among meals. To feed a dog >4 cups per day, you must select 3 meals.

10 Select Mode

CLOSED: Bowl door CLOSED. Door opens for assigned Pet, closes for unassigned Pet.
OPEN: Bowl door OPEN. Door closes for unassigned Pet. This mode good for starting timid pets on PortionPro Rx.

11 3 Easy Steps to Pair a Tag for the Assigned Pet to PortionPro Rx.

All tags will be “deny” tags unless assigned to this feeder. To assign more than one tag or no tags, see User Manual.

First Hold any one tag next to LCD screen. The and icons will flash.

Then Press to make this an assigned tag.

Last Press to confirm your choice. Then press again to complete setup.

*IMPORTANT: There is no need to pair the other tags. They are automatically paired as unassigned Pet Tags.

12 Attach Tag To Assigned Pet’s Collar

Attach the tag in front of any other collar tags. The logo on the tag should face away from the pet. This pet is now assigned exclusive access to this PortionPro Rx. Attach unassigned Pet Tags to other pets’ collars. All pets in your home should be wearing a PortionPro Rx collar tag.

13 Fill Food Bin

Use one type of dry food only with kibble sized 5/8” or less. For best results avoid irregular shaped kibble.

Your PortionPro Rx is now ready to use!

See Pet Acclimation Guide for key tips to help your pets quickly adapt. To set up another PortionPro Rx, repeat the steps above, keeping feeders at least 6 feet apart during set up and use. Pets wearing Unassigned Tags do not have to wear an additional Assigned Tag. Simply pair their current tag to the new PortionPro Rx as the Assigned Tag by following directions in Step 11. The Assigned Tag for one feeder is automatically paired as Unassigned Tag to all other feeders.

Manual Operation Steps
(Manual door operation in Closed Mode only)
(Note: All tags must be out of range during manual operation.)

To open bowl door, hold and at the same time for 2 seconds.

To close bowl door, hold and at the same time for 2 seconds.

To dispense 1 meal, hold and at the same time for 2 seconds.

If your PortionPro Rx sounds a tone and flashes a number, press to stop tone.

See Alert Code section on underside of food bin lid or Alerts and Troubleshooting section of User Manual.
